

HIP FRACTURE PREVENTION

with Fempro Armour

Hip fractures cause the most morbidity with reported mortality rates up to 20-24% in the first year after a hip fracture.

Loss of function and independence among survivors is profound, with 40% unable to walk independently, 60% requiring assistance a year later.

Because of these losses, 33% are totally dependent or in a nursing home in the year following a hip fracture.

REVOLUTIONARY SOLUTION

Fempro Armour's viscoelastic memory foam offers a revolutionary solution to minimize hip fractures amongst the elderly. The advanced material is designed to absorb and dissipate impact forces effectively, reducing up to 85% of impact energy entering the body. We are empowering the elderly to live more confidently and safely, compared to traditional padding.

Our Armor Is:

- ✓ Lightweight
- ✓ Discrete in design
- ✓ Offers enhanced mobility
- ✓ Decrease kinesthetic energy impact into the greater trochanter bone to prevent fracture
- ✓ European (CE) impact tested

Why Choose Us

Fempro Armour; is the Australian leader of shock absorbing viscoelastic body armour protectors, that offers vital protection against blunt impact injury, addressing unique dangers that a fall can bring to the elderly people, dementia suffers & those that are in danger of falling..
